

Sodium Aluminum Phosphate F/G BL-60[®]

Characteristics	Specification
Neutralizing Value	100 Minimum
Arsenic	3 PPM Maximum
Fluoride	0.0025% PPM Maximum
Lead	2 PPM Maximum
Sieving	
60 Mesh	1 % Maximum
100 Mesh	6 % Maximum
140 Mesh	15 % Maximum

Description

BL-60[®] is a formulated mixture of food grade sodium aluminum phosphate, acidic (LEVAIR) and food grade aluminum sulfate, anhydrous. It is a white free flowing powdered material

Uses

Leavening agent in baking powders and in prepared institutional and retail cake, cookie, muffin and pancake mixes. BL-60[®] is used with highly emulsified lactylated shortenings.

Packaging

50.00 lb bag
