

Salt-Iodized

Characteristics	Specification
Sodium Chloride	>99.1%
Calcium Sulfate	<0.3%
Other Salts	<0.1%
Moisture	< 0.1%
Potassium Iodide (mg/kg)	60-100
Dextrose (%)	<0.04
Sodium Silicoaluminate (%)	0.3-0.7

Product Description:

Table Iodized Salt is a blend of food grade granulated sodium chloride, selected from the middle screen fraction of vacuum pan production, with potassium iodine as a source of nutritional iodine. Dextrose is added to stabilize potassium iodide, inhibiting oxidative loss of iodine vapors. Sodium silicoaluminate is incorporated as a free-flowing, anticaking additive; it is acid-insoluble and very fine.

Packaging

50.00 lb Bag
