

Semtol 85[®]

Characteristics	Specification
Specific Gravity @ 25°C/25°C	.839/.855
Kinematic Viscosity @ 40°C,cSt	14.2/17.0
Color, Saybolt	+30
Pour Point, °C	-7

Product Description

Semtol[®] 85 is a highly refined technical white mineral oil that is primarily composed of saturated aliphatic and alicyclic non-polar hydrocarbons. It is hydrophobic, colorless, tasteless, odorless, and chemically inert. It has excellent UV & color stability. Semtol 85 meets the FDA requirements as per 21 CFR 178.3620(b) for technical white mineral oil.

Packaging

385.00 lb Steel Drum
