

Super White Protopet[®]

Characteristics	Specification
Specific Gravity @ 25°C/25°C	.815/.880
Melting Point, °C	54.4/60.0
Consistency	180/210
Color, Lovibond 3cell	-1.0 Maximum

Product Description

Semtol[®] 85 is a highly refined technical white mineral oil that is primarily composed of saturated aliphatic and alicyclic non-polar hydrocarbons. It is hydrophobic, colorless, tasteless, odorless, and chemically inert. It has excellent UV & color stability. Semtol 85 meets the FDA requirements as per 21 CFR 178.3620(b) for technical white mineral oil.

Packaging

385.00 lb Steel Drum
